DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 7 recites the limitation "said crosspiece" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Delbor 5725305 cited on PTO 1449.

Delbor teaches a planar member 12, with articulation points 6, 10 to provide a movement of the wire coiled member 14 and the frame 12, 9 joined to the handle

2.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1723

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Delbor 5725305 cited on PTO 1449.

Delbor discloses all of the recited subject matter as defined within the scope of the claims with the exception of the shape of the wire loop having shapes of a having a point, or a heart, or an oval, or a triangle. Absent any unexpected result, such shapes of a point, or a heart, or an oval, or a triangle are known shape without any unexpected geometrical feature. Thus it is deemed absent any unexpected result, it is deemed that it would have been obvious to one of ordinary skill in the art to modify the shape of the loop to a more aesthetically pleasing shape whereas such shapes are common shapes. It has been held that, absent any unexpected result, a mere change in form or shape on the basis of suitability is a matter of obvious mechanical design choice. In re Dailey, 149 USPQ 47 (CCPA 1976).

5. Claims 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over a Delbor 5725305 in view of GB 618185 (both cited on PTO 1449).

Delbor 5725305 discloses all of the recited subject matter as defined within the scope of the claims with the exception of having a wire loop bend from the handle legs to secure to the loop. The GB reference discloses a whisk having a loop portion F and legs C,C from the handle A having loops D which engage the loop thereby having a pivot point. Accordingly, it is deemed that it would have been obvious to one of ordinary skill in the art to modify the articulation points of the Delbor reference with legs having a

Art Unit: 1723

bent over portion as seen by the GB reference so that the loop of Delbor may be more easily attached to the handle.

Allowable Subject Matter

6. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 7-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Doerr 1530716, harris 2906510, Tompkins 2141307, Bennett et al 973847, disclose pivoting frames and frames with coils.
